

The PVDC connection centres from matt:e are the perfect way to compliantly, efficiently and neatly integrate all Solar PV AC connections

- * Space and time saving, typically up to an hour on installations
- * 35mm² terminals for wire in wire out connectivity. No more Henley Blocks and garage boards!
- * Built in generation meters, reducing the risk of poor on site terminations
- * 100amp mains switch for combined PV and consumer unit isolation
- * Dedicated double pole PV supply 16amp RCBO
- * BS 7671:2008 Amendment 3 Compliant*

PVM CC 1

The PVM CC 1, Space saving at just 160mm wide x 230mm high and 80mm deep comes complete with the Owen Brothers OB 100 single module MID approved generation meter. Creating the most compact single box solution available.

PVM CC 4

The PVM CC 4, comes complete with the Owen Brothers OB 400 MID approved generation meter, read through an open viewing panel. Ideal for home owners who like to keep an eye on their generation!!

PVM CC S2M

The PVM CC S2M, comes complete with the Orsis S2M approved generation meter. Offering the perfect solution for all remote metering and monitoring of PV systems.

...Simplifying PV connection

Unit 1c Neander Lichfield Road Industrial Estate Tamworth Staffordshire B79 7XA

*Due to the number of consumer unit fires reported within domestic properties regulation 421.1.201 has been added to BS 7671: 2008, which requires consumer units and similar switchgear to have their enclosures manufactured from non combustible material or to be enclosed in a cabinet constructed from non combustible material.
